

BATHROOM LOCK - HEAVY DUTY - KNOB SET & THUMBTURN

Wood Screw Fixings

Supplied with matching wood screw fixings.

A heavy duty lock for bathroom doors which need to be locked from the inside but emergency access from the outside. Can be used in conjunction with knob sets and thumbturns. Shown here with the Beehive Knob Set - Ebonised Black & polished Nickel - 83634 & Round Thumbturn - Polished Nickel - 83824.

Thumbturn Spindle

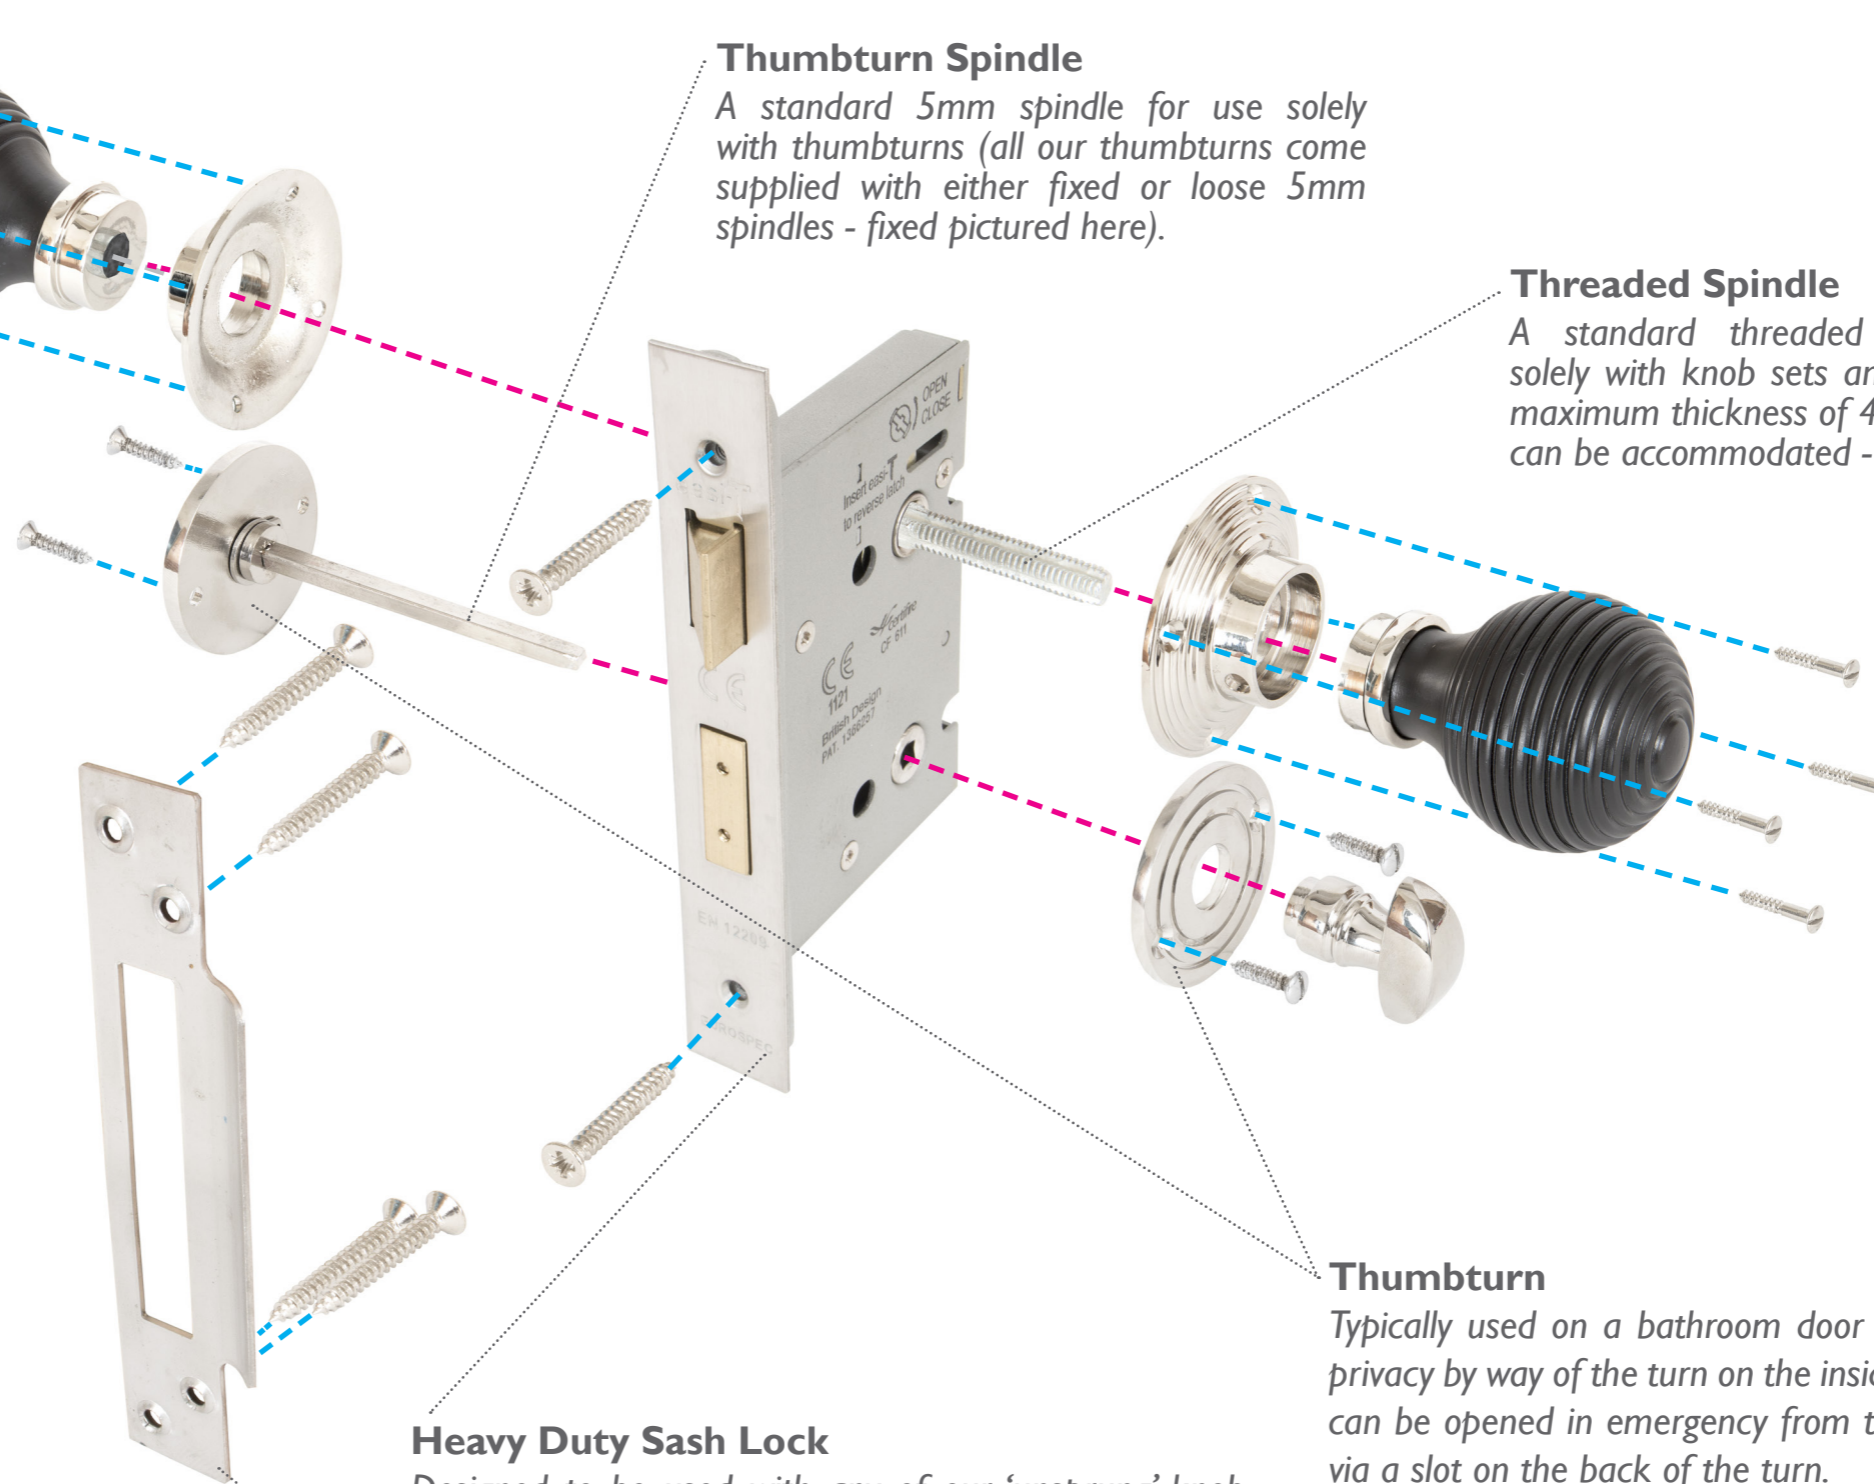

A standard 5mm spindle for use solely with thumbturns (all our thumbturns come supplied with either fixed or loose 5mm spindles - fixed pictured here).

Threaded Spindle

A standard threaded spindle for use solely with knob sets and on doors with a maximum thickness of 44mm (larger doors can be accommodated - see website).

Unsprung Knob Set

All of our door knob sets are unsprung and therefore use the spring incorporated into the lock to allow it to spring back to its original position.

Thumbturn

Typically used on a bathroom door to provide privacy by way of the turn on the inside but also can be opened in emergency from the outside via a slot on the back of the turn.

Heavy Duty Sash Lock

Designed to be used with any of our 'unsprung' knob sets. Mortised into the door and screw fixed in.

Receiver Plate

Fitted to the frame of the door and screw fixed in.
