

BATHROOM LOCK - HEAVY DUTY - UNSPRUNG LEVER HANDLE

A heavy duty lock for bathroom doors which need to be locked from the inside but emergency access from the outside. To be used in conjunction with 'unsprung' lever handles. Shown here with the Monkeytail Lever Bathroom Handle - Black - 33266.

Unsprung Handle

Our 'unsprung' handles should only be used with heavy duty sash locks as there is a strong spring incorporated into the lock which will always bring the lever back up to the horizontal position.

Split Spindle

A standard split spindle for use on doors with a maximum thickness of 44mm (larger doors can be accommodated - see website).

Thumbturn Spindle

A standard 5mm spindle for use solely with thumbturns (all our thumbturns come supplied with either fixed or loose 5mm spindles - loose pictured here).

Thumbturn

Comes as either fixed or loose depending on the handle.

Heavy Duty Bathroom Lock

Designed specifically for use in bathrooms and with lever handles that have bathroom thumbturns. Mortised into the door and screw fixed in.

Receiver Plate

Fitted to the frame of the door and screw fixed in.

Wood Screw Fixings

Supplied with matching wood screw fixings.
