

Wood Screw Fixings

Supplied with matching wood screw fixings.

SASH LOCK - HEAVY DUTY - KNOB SET & ESCUTCHEON

A heavy duty sash lock for doors which need to be locked and can be used in conjunction with door knob sets. Shown here with the Beehive Knob Set - Ebonised Black & polished Nickel - 83634 & Beehive Escutcheon - Polished Nickel - 83809.

Unsprung Knob Set

All of our door knob sets are unsprung and therefore use the spring incorporated into the lock to allow it to spring back to its original position.

Threaded Spindle

A standard threaded spindle for use solely with knob sets and on doors with a maximum thickness of 44mm (larger doors can be accommodated - see website).

Escutcheons

Tidy up the appearance of the hole in your door and to protect the wood against marks/scratches made by the key - escutcheon needed for both sides. Screw fixed to surface.

Heavy Duty Sash Lock

Designed to be used with any of our 'unsprung' knob sets. Mortised into the door and screw fixed in.

Key Locking

All of our sash locks come supplied with 2 or 3 keys and can either be key to differ or keyed alike.

Receiver Plate

Fitted to the frame of the door and screw fixed in.
